150 ejemplos y 10 proyectos

Lily Perera

Software Developer | Back End Developer | Python | Django |
Django Rest Framework | HTML | CSS
Lagoa Vermelha, Rio Grande do Sul, Brazil

Summary

I am someone whose priority is to develop people and team spirit. The well-being of the group and the mutual trust of people are very important factors. There is a trend towards environments that allow collaboration and interaction between people. I also prefer environments with more interdependence between people and areas. But I tend to prefer systems where people are valued and their contributions are recognized. I am also someone who seeks to have things clear and direct. Being clear about what must be true and the paths you can take is important. This preference also demonstrates a focus on quality and rationality.

Experience

ETECSA_Cuba

Back End Developer

April 2014 - June 2022 (8 years 3 months)

Cuba

Statistics and information services in fast response environments.

Complaints and information service station.

Information control system and technological problems.
